INTRODUCTION
Based on the directives of the canton of Vaud and the Federal Office of Public Health and the recommendations of the Association of Swiss Museums, the Olympic Museum presents its protection plan here. The public is informed of the measures in force and the expected behaviour on the website https://olympics.com/musee and in the Museum.

1. Hygiene measures

All persons present inside the Museum have the opportunity to clean their hands regularly. For this purpose, a hydroalcoholic solution is made available at the entrances to the Museum and in the exhibitions. Use by visitors is verified upon entering the Museum.

Soap dispensers are available in the washrooms accessible to the public. Surfaces are cleaned regularly. There are enough garbage cans available. Closed garbage cans are placed at the exits of the site to receive used masks.

The cleaning plan is intensified to ensure more regular cleaning (desks, touch screens, toilets, door handles, elevator buttons, stair railings. Surface cleaning staff wear disposable gloves. Garbage cans are emptied regularly.

Audioguides and audiophones are disinfected after each use.

The spaces are regularly ventilated with renewed filters

Library: Media returned or consulted are disinfected before they are made available again.

2. Social distance

The obligation to present a certificate removes the obligation to maintain the distance for visitors. However, pictograms encourage keeping the social distance of 1.5m.

3. Events at the Olympic Museum

The presentation of the COVID certificate is mandatory for all persons from 16 years of age, which means that events can take place without restrictions (and therefore without wearing a mask). Guided tours, openings, conferences and workshops are considered as events.

4. COVID-19 Certificate

Access to the Museum, its shop, its restaurant including its outdoor space and its library is only possible on presentation of the COVID certificate and a photo ID to the security officer at the entrances of the museum. The certificate requirement applies to persons 16 years of age and older.

For click&collect in the library there is no certificate requirement, the collection is organized in such a way that the stay is limited to the necessary time and that the other protective measures (obligation to wear a mask, distance) apply.
5. **Protection of the staff**

The staff follows the FOPH recommendations for hygiene and distance and the STOP principle is applied. Teleworking is always recommended.

Before entering the buildings, employees are required to be in possession of the COVID-19 certificate.

For non-vaccinated persons, the staff undergoes rapid anti-genic tests (every 48 hours) paid for by the employer and which entitles them to obtain a certificate.

The application of security measures is monitored daily by a security officer.

Employees are informed on the IOC intranet site of their rights and protection measures to be applied.
