INTRODUCTION

Based on the directives of the canton of Vaud and the Federal Office of Public Health (OFPH) and the recommendations of the Association of Swiss Museums, the Olympic Museum presents its protection plan here. The public is informed of the measures in force and the expected behaviour on the website https://olympics.com/musee and in the Museum.

1. Hygiene measures

All persons present inside the Museum have the opportunity to clean their hands regularly. For this purpose, hydroalcoholic solutions are made available at the entrances to the Museum and in the exhibitions. Use by visitors is verified upon entering the Museum. Soap dispensers are available in the washrooms accessible to the public. Surfaces are cleaned regularly. Closed garbage cans are placed at the exits of the site to receive used masks. The cleaning plan is intensified to ensure more regular cleaning (desks, touch screens, toilets, door handles, elevator buttons, stair railings. Surface cleaning staff wear disposable gloves. Garbage cans are emptied regularly. Audioguides and audiophones are disinfected after each use. The spaces are regularly ventilated with renewed filters. Library: Media returned or consulted are disinfected before they are made available again.

2. Social distance

The social distance to be respected between people is 1.5 meters. In the seating area, the seats are arranged so that, as far as possible, a distance of 1.5m is respected between the seats. Groups of people for whom the respect of the distance is not appropriate are exempted from the prescriptions relating to distance: in the case of school children, families or people living under the same roof.

3. Masks

Wearing a mask is mandatory for visitors in all interior spaces from the age of 12. In the restaurant, customers can only consume while they are seated (food and drinks). Wearing a mask is mandatory for customers when they are not seated. Those who can prove that they cannot wear a mask for medical reasons are exempt.

4. (2G) COVID-19 Certificate

Access to the Museum, its shop, its library and its restaurant, including its outdoor area, is only
possible upon presentation of the 2G COVID certificate (Vaccinated or cured) with QR code (Swiss or European) and an ID with photo. In the absence of these two documents, entry will be refused. For tourists without a Swiss or European certificate, a request to obtain a COVID certificate valid in Switzerland can be made from the federal authorities https://covidcertificate-form.admin.ch/foreign.

The certificate requirement applies to people aged 16 and over.
For click&collect in the library there is no certificate requirement, the collection is organized in such a way that the stay is limited to the necessary time and that the other protective measures (obligation to wear a mask, distance) apply.

5. Protection of the staff

The staff respect the OFPH recommendations in terms of hygiene and distance. Teleworking is mandatory wherever it is possible to work from home without disproportionate effort.
If teleworking is not possible, wearing a mask is mandatory at all times except if the employee is alone in a room.
Before entering the buildings, employees are required to be in possession of the COVID-19 certificate.
For non-vaccinated persons, the staff undergoes very regular rapid anti-genic tests paid by the employer and which entitles them to obtain a certificate.
The application of security measures is monitored daily by security officers.
Employees are informed on the IOC intranet site of their rights and protection measures to be applied.
