International Olympic Committee

FACTSHEET

Integrity Betting Intelligence System (IBIS)

10 February 2026

What IBIS is

- **Secure Information Exchange Platform:** Facilitates the secure exchange of information and intelligence on competition manipulation and breaches of the Olympic Movement Code on the Prevention of the Manipulation of Competitions (OM Code PMC), particularly related to sports betting.

- **Permanent and 24/7:** IBIS is a permanent, round-the-clock IT-platform that allows the exchange of information on the Olympic Games and sports events organised by the Olympic Movement.

What IBIS does

- **Enables Two-Way Communication:** Ensures direct, real-time communication between Olympic Movement stakeholders (such as IFs and NOCs) and the global sports betting ecosystem (licenses private operators, regulators, and state lotteries).

- **Collates and Distributes Information:** Collects, analyses and shares intelligence related to sports betting for use by concerned Olympic Movement stakeholders.

- **Supports Integrity Operations at the Games:** IBIS is integrated into the Joint Integrity Units established for the Olympic Games, such as those implemented for Milano Cortina 2026.

Aims of IBIS

- **Foster Cooperation:** Creates a framework for transparency, confidentiality, trust and cooperation between the Olympic Movement and the sports betting industry.

- **Protect Sports Integrity:** Connects IFs, NOCs and multisport event organisers with betting operators to protect sport from competition manipulation through betting alerts and intelligence.

- **Protect Athletes:** Safeguards clean athletes and sportspersons from potential manipulation linked to sports betting.

Mechanism

- **In-House Platform:** IBIS is a bespoke IOC Business Application that allows direct and confidential communication online.

- **Single Points of Contact:** Established Single Points of Contact (SPOCs) for each partner organisation to ensure communication on the IBIS platform.

- **Dedicated Onboarding:** Ensures secure access to the IBIS platform for all SPOCs.

- **Free of Charge:** The IOC covers the costs of the platform, thus making it accessible to all partners.

- **Operational Since 2014:** Established following the London Games 2012, IBIS has been fully operational since the Sochi 2014 Winter Games.
